PROJECTS

Ransomware Victim Detection Application
7 Months

NocturnOps is an automated, real-time Threat Intelligence platform designed to continuously monitor and aggregate ransomware group activities across the dark web and external APIs. Its core ingestion engine utilizes AI-driven enrichment to automatically classify victim industries, extract geographic locations, and calculate a strict 4-tier threat severity index. Powered by a self-healing database pipeline and a high-performance Flutter frontend, the platform provides security analysts with instantaneous threat alerts, live geographical mapping, and actionable adversary tracking.
